

# GENERIC FLUID SYSTEMS

**Robust. Accurate. Reliable.**  
Industrial Formulation Dispensers  
Solvent and Water-Borne Materials

Providing the fastest, most dependable, and most accurate multi-ingredient fluid batching systems available. Our systems dramatically improve productivity, accuracy and cost reduction.

## WHY BATCHMETRIX

- Proportion or Ratio materials in any size batch
- Minimum floor spacing required for machine
- Completely customizable
- Easy to clean stainless steel structure & surface
- Software that contains all historical data
- Simple Installation

## USES INCLUDE

- 2 to 6 component paint ratio batching system
- Wood stains and varnish
- Adhesives manufacturing
- Chemical blending and custom formulation
- Ink manufacturing and tinting

## BATCHMETRIX

MULTI-INGREDIENT, RATIO AND FORMULA DISPENSER

# GENERIC FLUID SYSTEMS

## CUSTOM SOLUTIONS

The BATCHMETRIX technology involves the simple proportioning of ingredients from a cup to a 5 gallon container. It comes standard with 6 ingredient capability and the BATCHMETRIX utilizes a high performance scale (intrinsically-safe) to accurately ratio ingredients. Our dispense station components can be combined to produce a solution for any of your production needs. The BATCHMETRIX will improve your competitive edge.

A PERSONAL DEMONSTRATION USING  
YOUR RAW MATERIALS.**

Dispensing Size Range	1 Cup to 5 Gallons
Dispensing repeatable minimum shot size	Within 1% (1 Percent)
Viscosity Range for supply materials	0 - 3,000,000 cp
Materials supported	solvent borne or aqueous
Supply of materials (external)	via SS Pressure Tanks, Drum Pumps, etc.
Fluid Circuit Capacity	2 to 6
Operating environment	from unclassified up to Class 1/Division 1
Machine composition materials	Stainless Steel
Footprint	approximately 5 sq.ft.
Weight	approximately 150 lbs.
Electric	120 AC / 3 Amps
Pneumatic	90 p.s.i.
